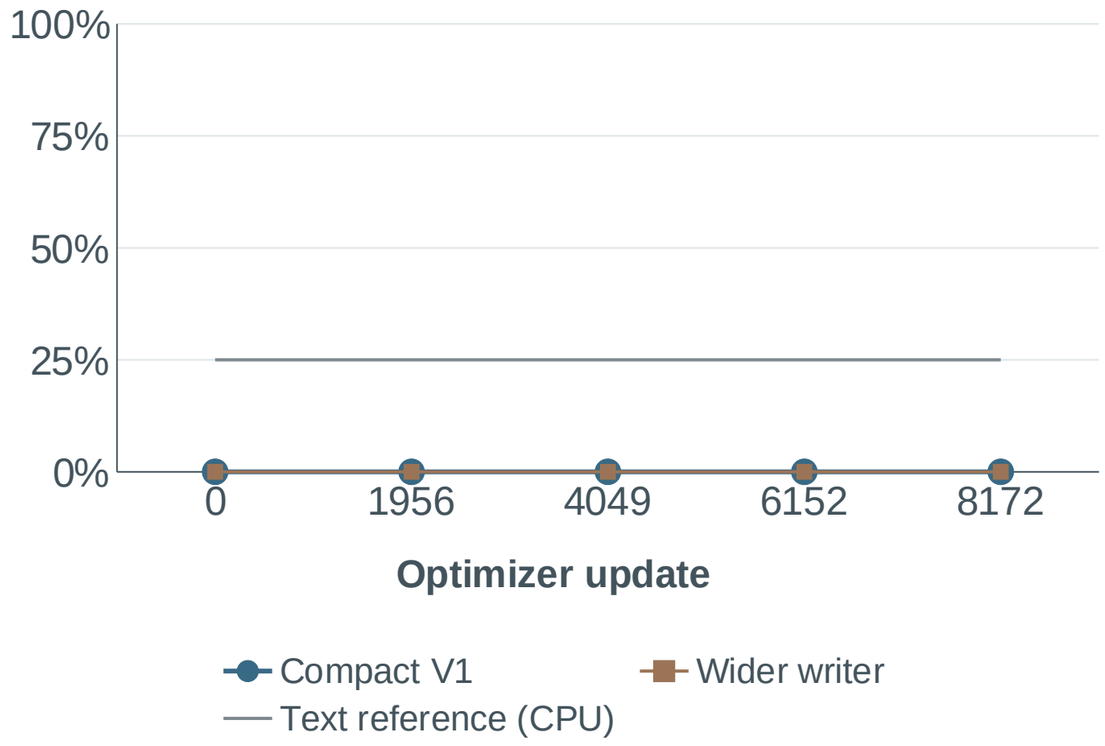
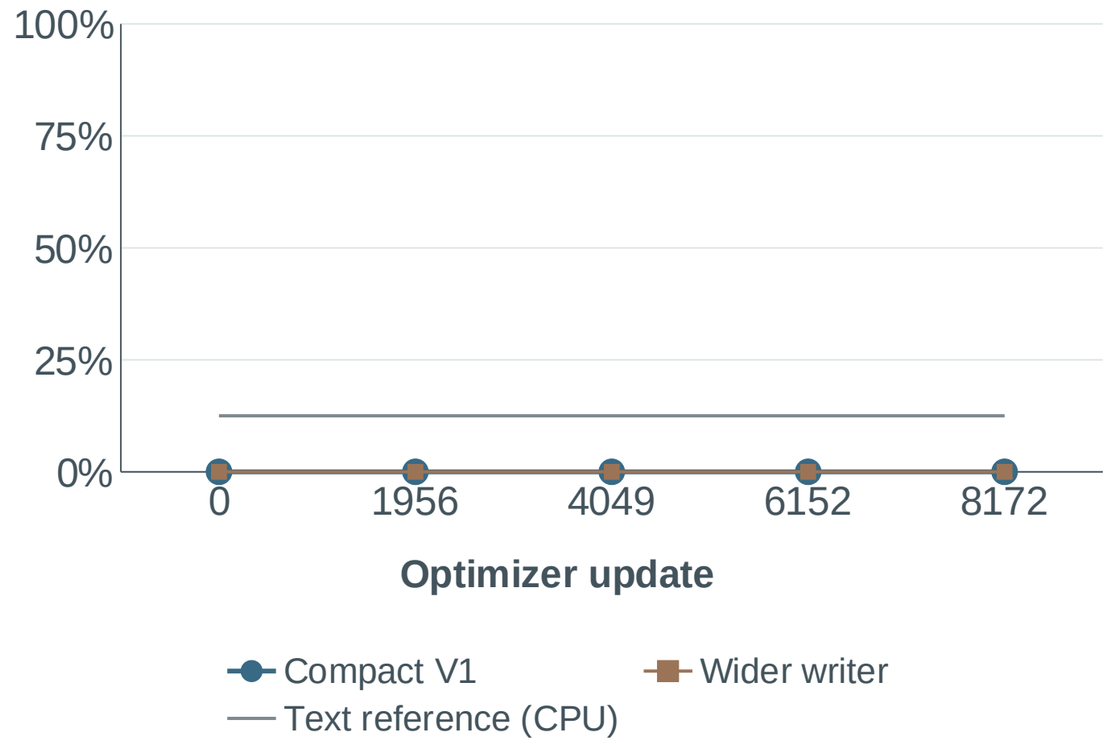
Wider writer: complete-answer evaluation

a



Both visual models: 0/32 at all five checkpoints
Text reference: 8/32

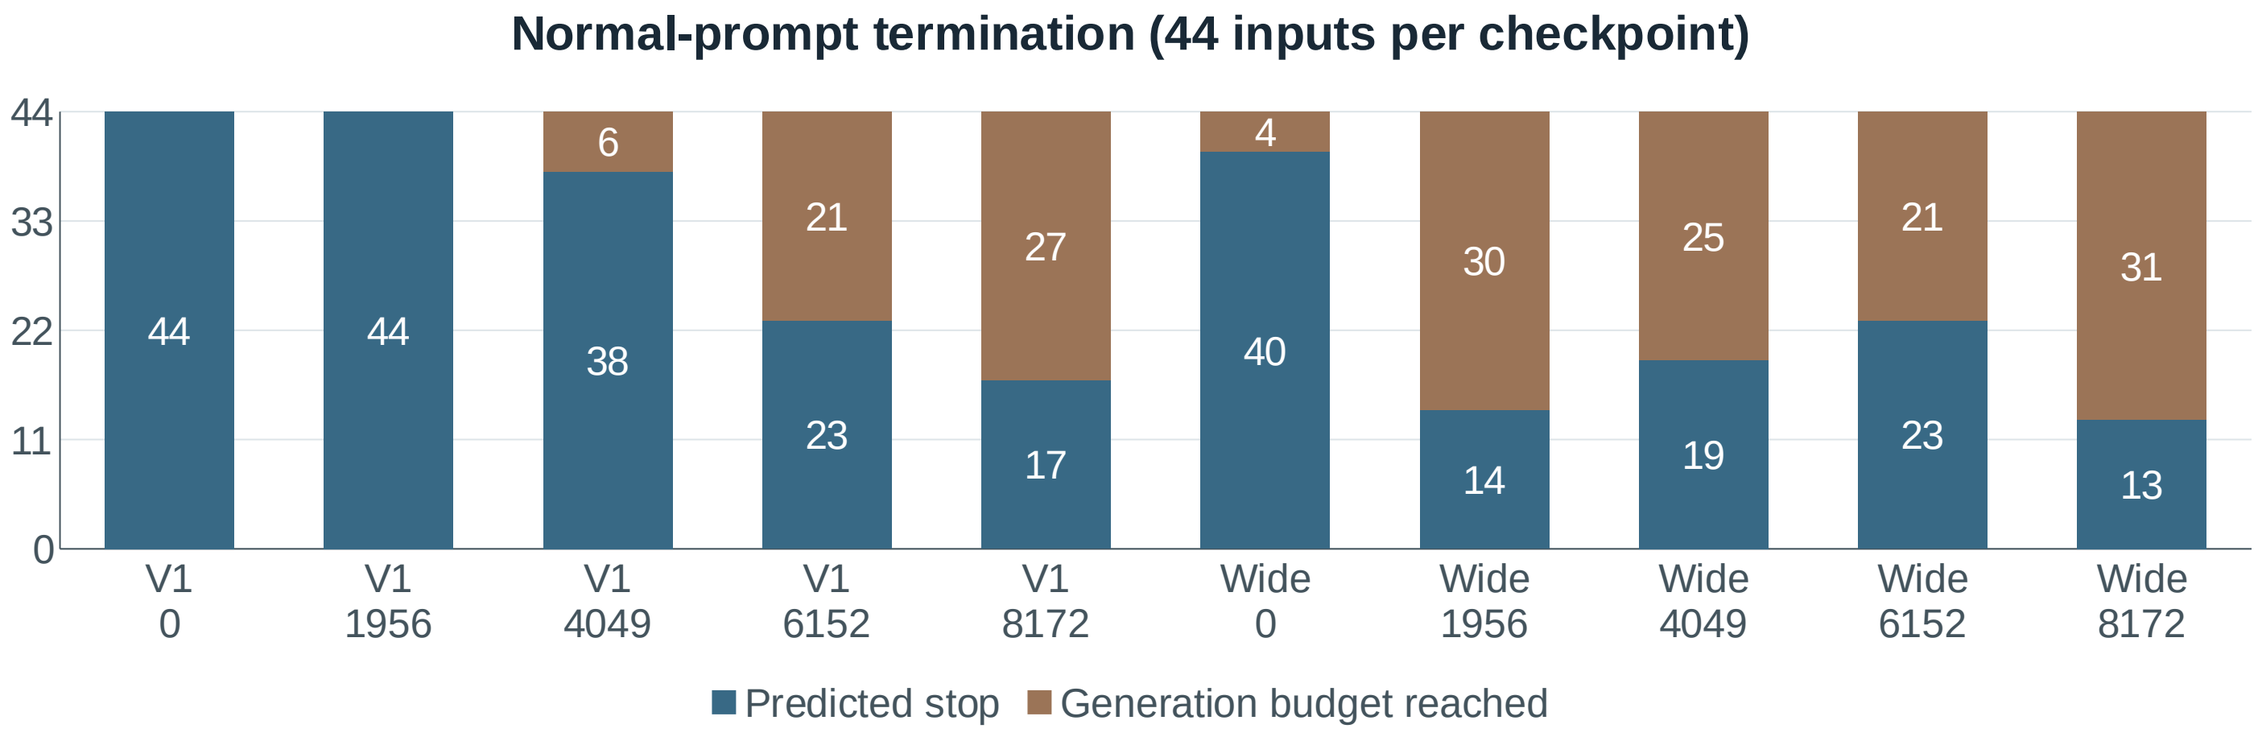
b



Both visual models: 0/16 at all five checkpoints
Text reference: 2/16

The two zero-valued visual curves overlap. Pointwise group intervals are [0, 0].
Constant observations do not imply zero population success.

c



Blank outputs remain in the denominators. Wider final: 4 blank, 13 stops and 31 capped.
Each model retains all 372 outputs and a single model-based opaque review.

No independent human adjudication. The CPU reference gives task quality, without a hardware-matched efficiency comparison.
