Native answer access and first-image writing

a

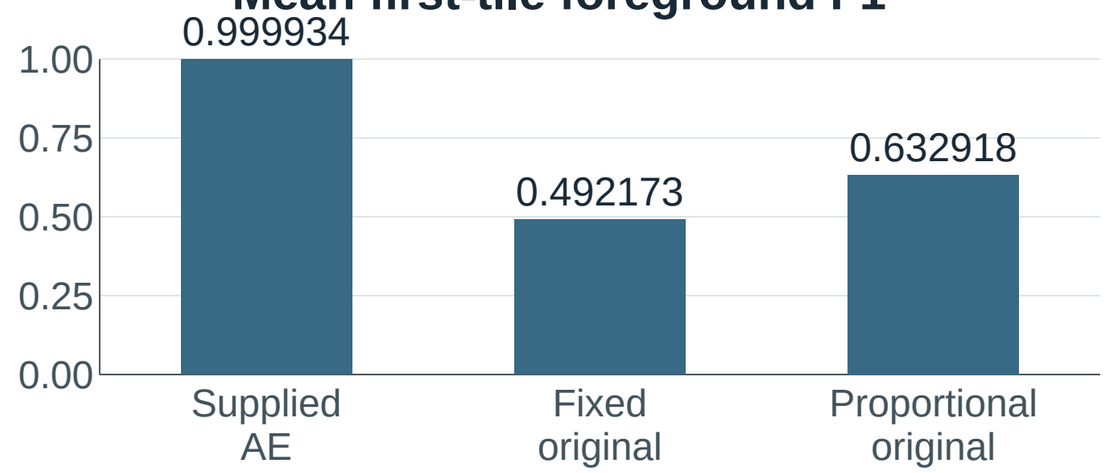

b

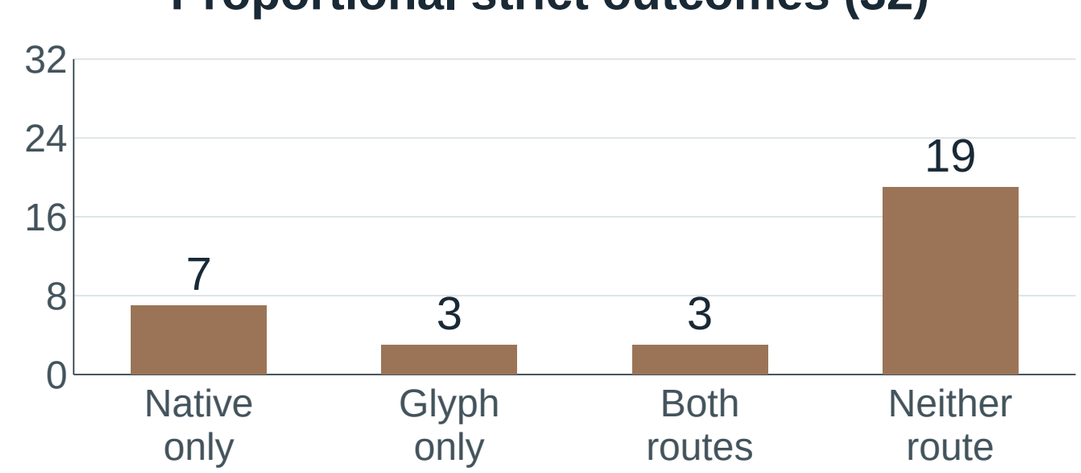

Native decoding is an external diagnostic. All 192 adapted image prefills match actual glyph states.
Proportional native minus glyph exact QA: +12.5 points (95% interval 0 to 25).

c

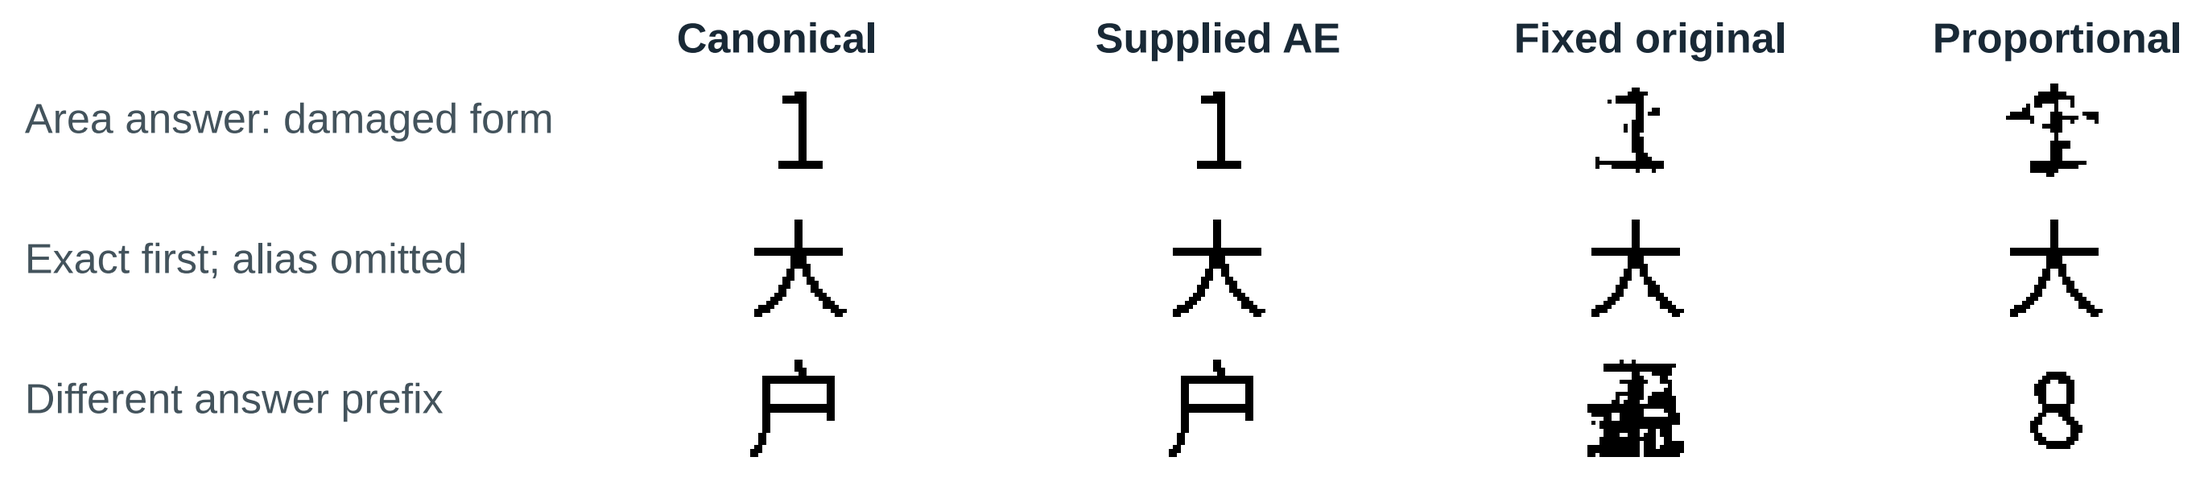

Supplied images reveal physical support, not language.
First pixel-exact: 31/32 supplied, 0/32 fixed, 3/32 proportional.

d

Native only: six uncertain readings, one alias omission.
Glyph only: native wording or punctuation differs.

e Original first tiles

First-tile excerpts selected retrospectively. All 32 comparisons and 192 original streams remain available.
Pixel differences do not grade meaning. One model reviewer, no independent human adjudication.
