Writing fidelity depends on the output representation

a Training F1 (%) | n=64

Exact blocks: 0/64, 63/64, 0/64, 64/64

b Development F1 (%) | n=128

Exact aligned: direct 3/128; fixed codec 126/128

c First two fitting rows

	Reference	Reader flow	Reader direct	Pixels flow	Pixels direct
1					
2					

d First two development rows

	Reference	Direct	Codec
1			
2			

Fitting uses training images. Development compares supplied representations with unequal prior training; neither is question answering.
