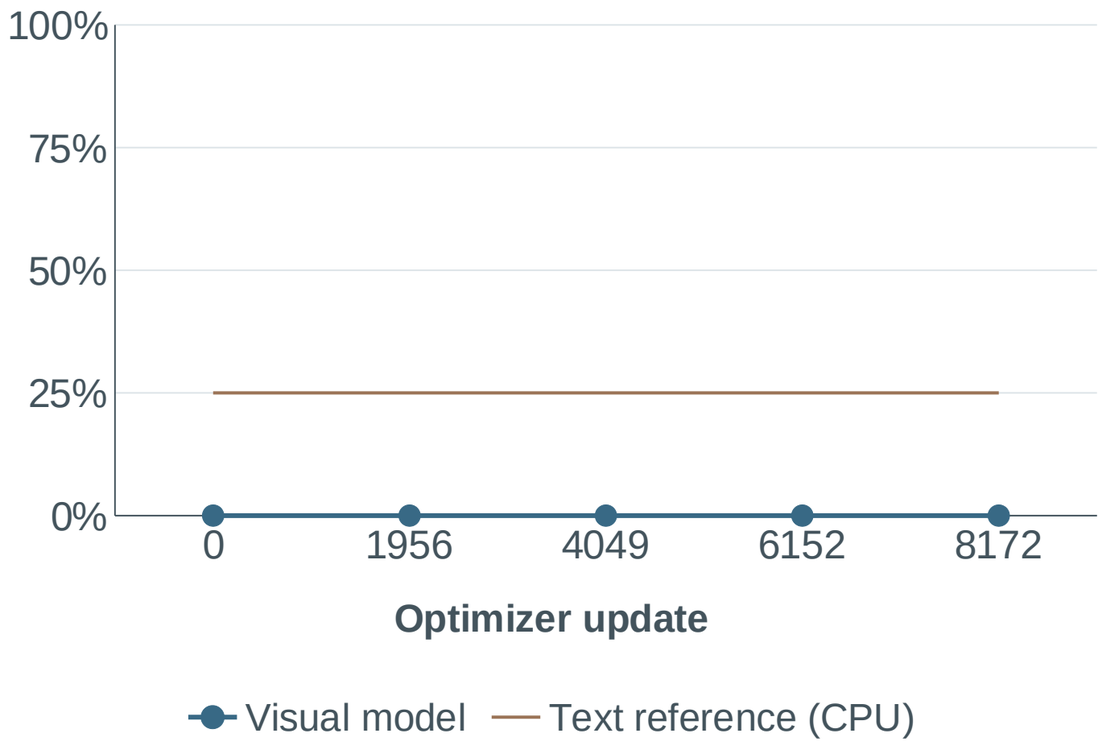
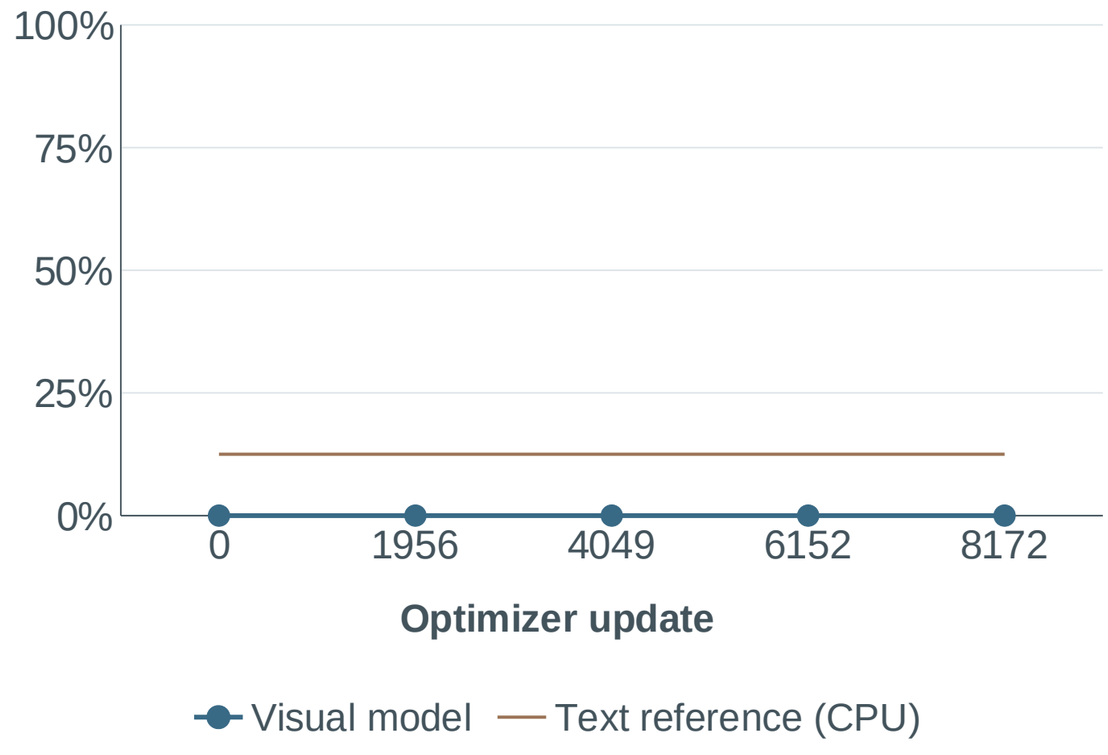
Compact V1: complete-answer evaluation

a



Visual model: 0/32 at every checkpoint
Text reference: 8/32; 95% interval 9.375% to 43.75%

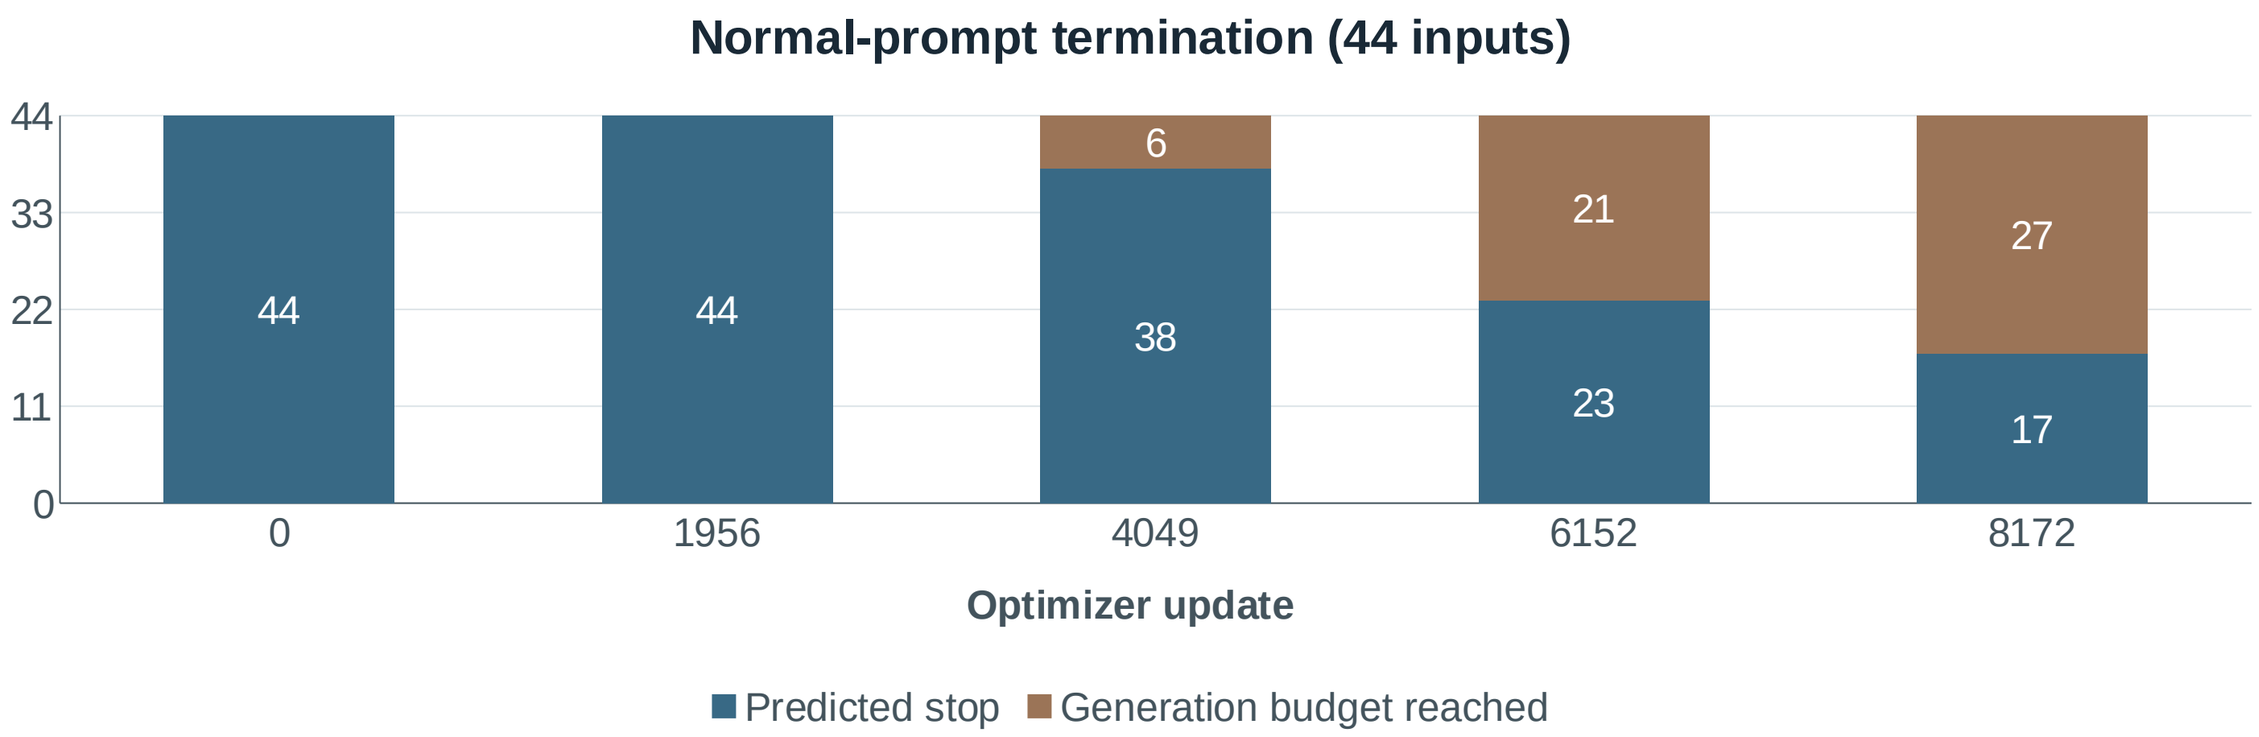
b



Visual model: 0/16 at every checkpoint
Text reference: 2/16; 95% interval 0% to 31.25%

Pointwise passage-group intervals are [0, 0] for every visual-model point.
Constant observations do not imply a zero population success probability.

c



Empty responses, included above: 9, 9, 8, 2, 2 of 44 at successive checkpoints.

All 372 outputs retained. One model-based visual review; no independent human adjudication.
Training completion and stopping do not establish readable language generation.
