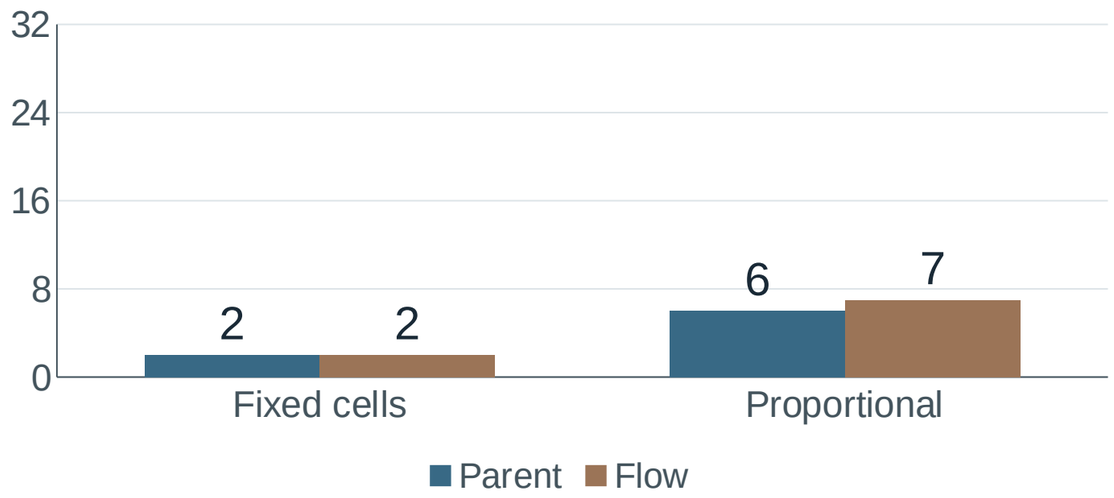
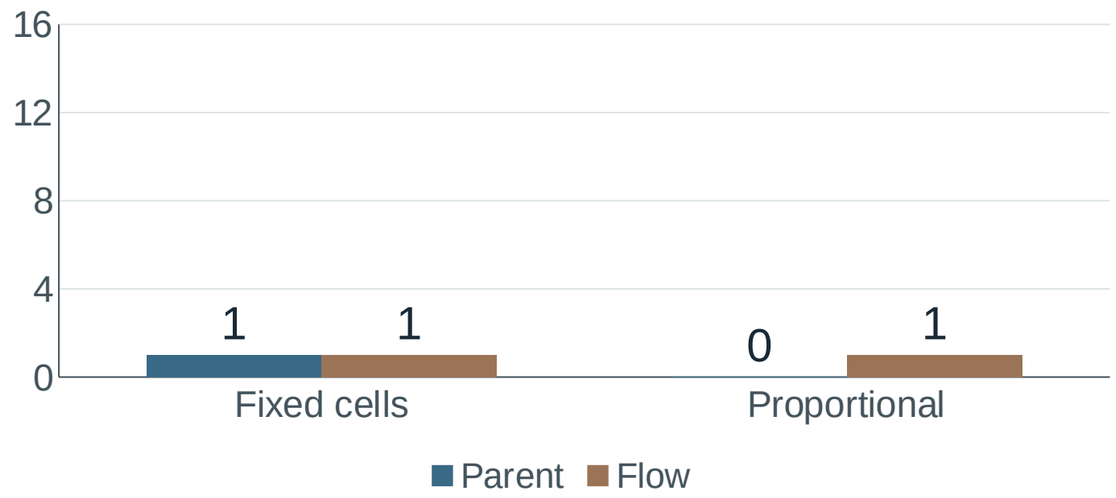
Conditional motor repair and its limits

a

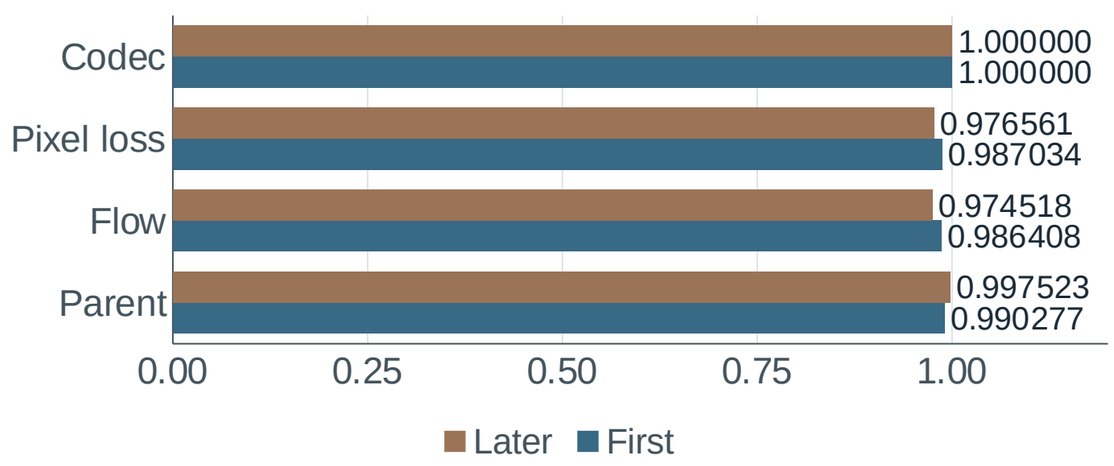


b

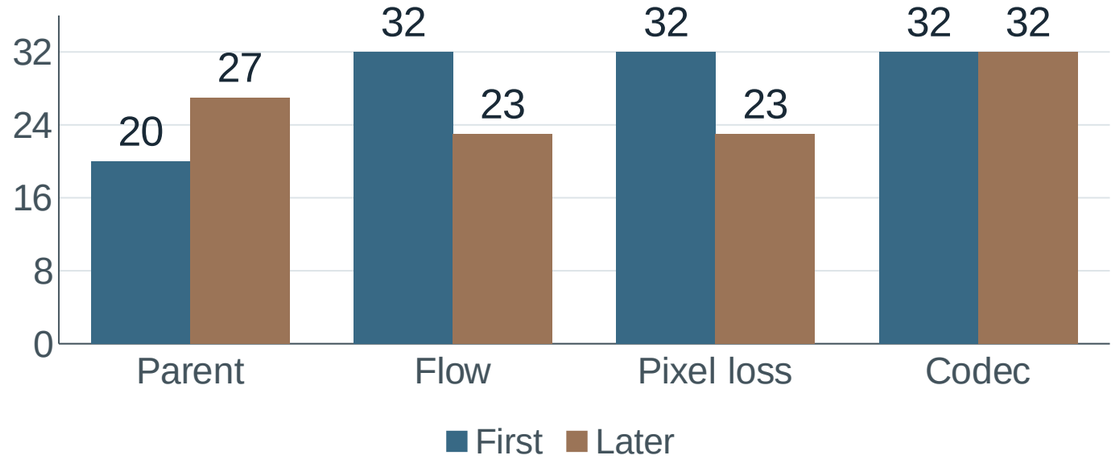


Flow retains 5/6 proportional exact answers. The registered language pilot fails.
Proportional exact-QA difference: +3.125 points (95% interval −6.25 to 12.5).

c



d



Each pool requires median ≥ 0.99 and ≥ 30/32 tiles at F1 ≥ 0.95. Both new writers fail.
Pixel-loss whole-answer scores are unmeasured. Codec receives the target image.

e Original tile excerpts

	Target	Parent	Flow	Pixel loss	Codec
Training: recovered first form					Training: damaged later form					
QA: native prefix agrees					
QA: recovered area initial					
Retrospective excerpts. All 216 flow streams and 16 diagnostic boards remain available.
Reused development cohort, one model reviewer, no independent human adjudication.
