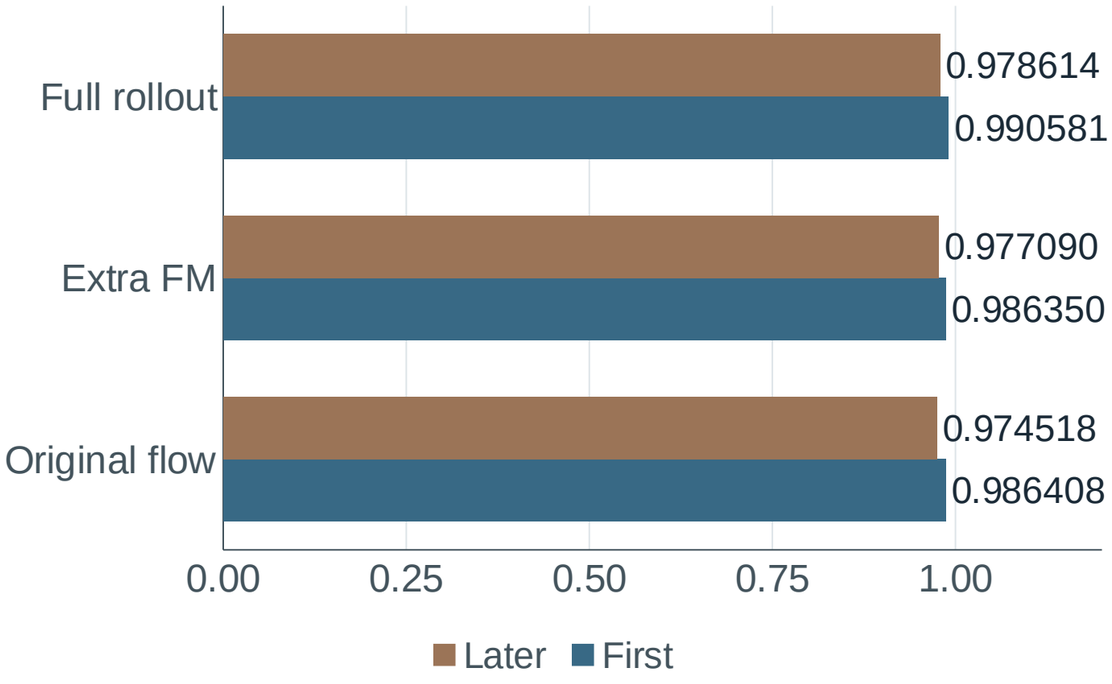
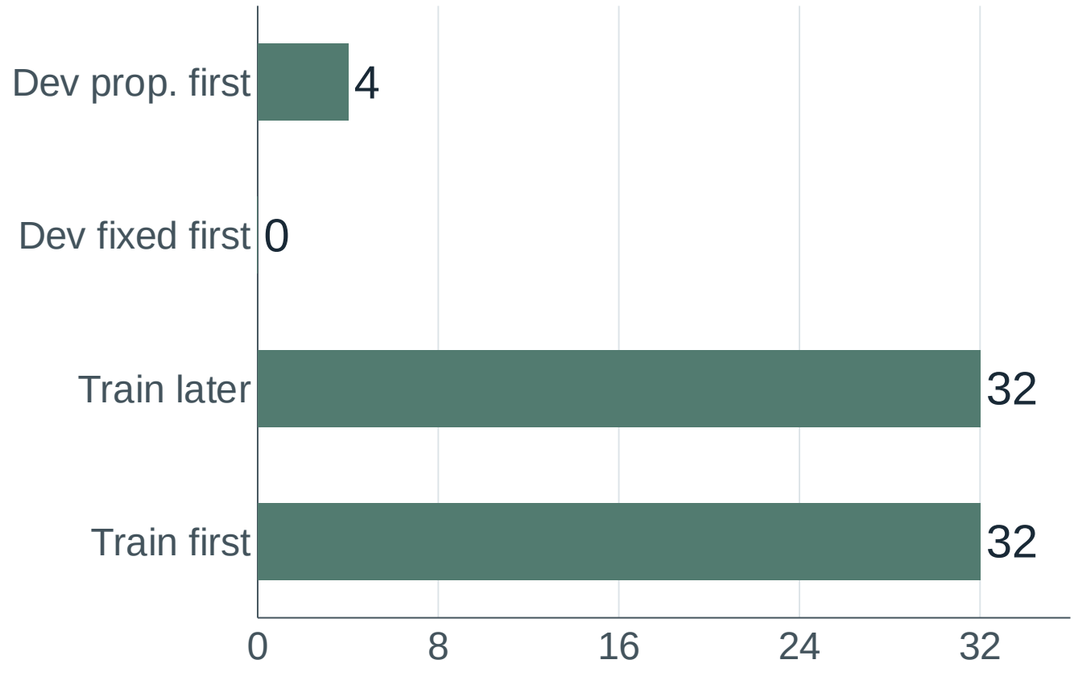
Physical writing and complete-answer transfer

a



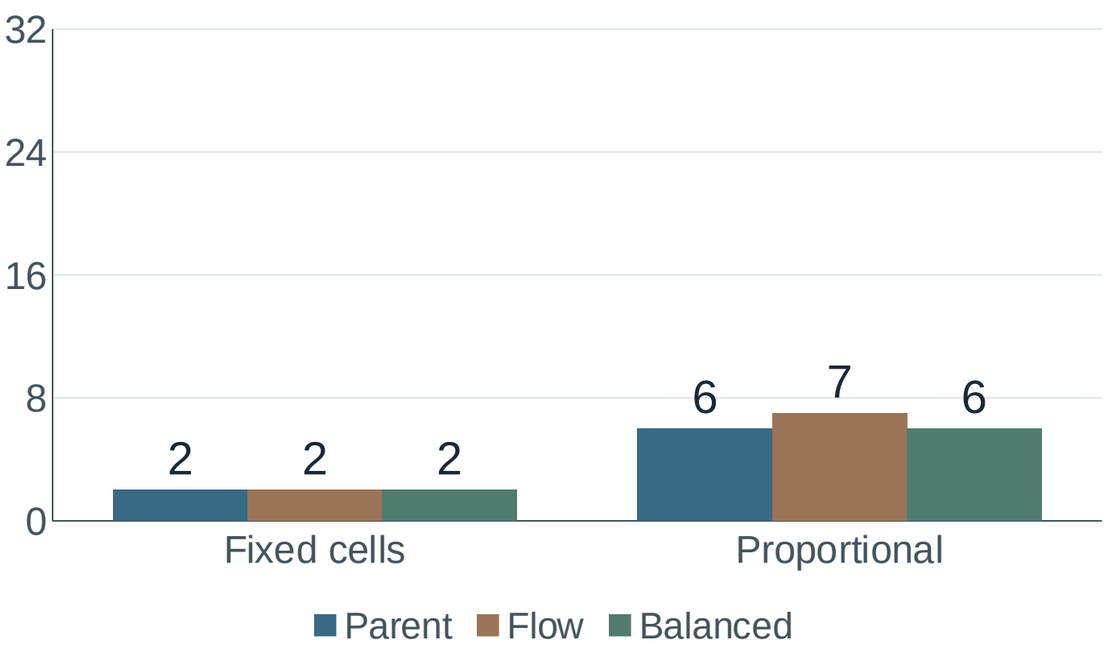
Median gate 0.99 and ≥30/32 at F1 ≥0.95
Full rollout passes first only

b

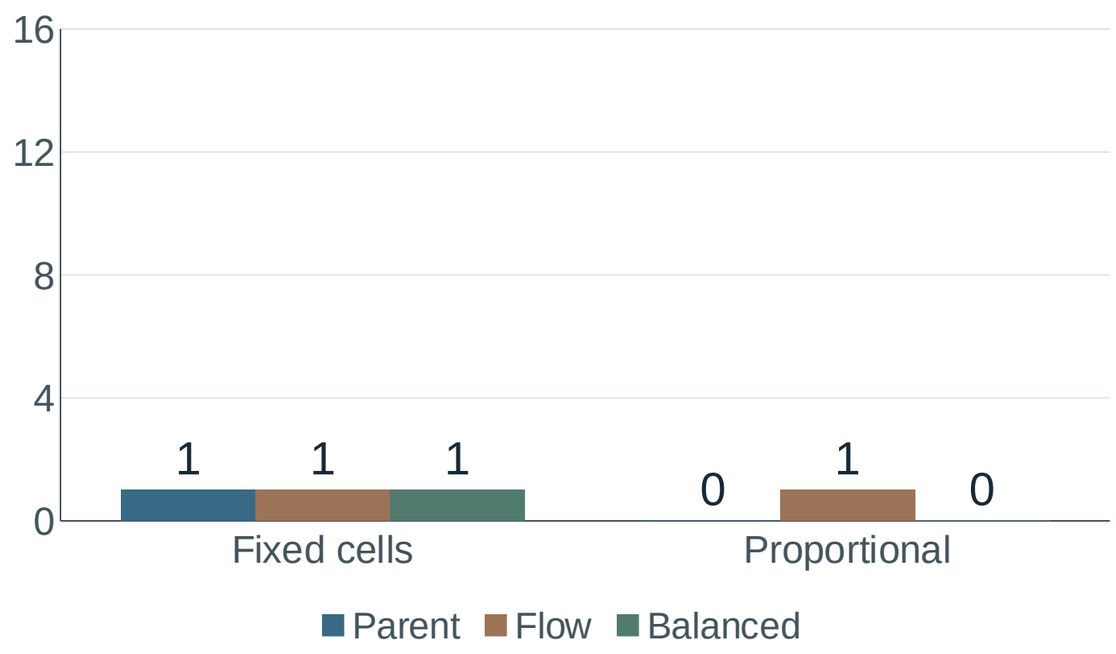


Training states and development first states
Canonical pixels do not grade meaning

c



d



Balanced retains 6/8 required proportional exact answers. Prospective pilot: fail.

Readout and stopping change together. The reader and image codec remain frozen.
Rollout whole-answer scores are unmeasured and have no language bars.

Model comparisons, not a language-learning curve. Reused development cohort.
One model reviewer, no independent human adjudication or untouched confirmation.
